

The Goût'st  ve family expands!

The **MORE** little autoclave,
that **STILL** has everything of a big one!

An **horizontal** autoclave, **easy** to use and install
100% electric, designed for **small structures** !

STILL
MORE
EFFICIENT

MORE
ECONOMICAL

MORE
COMPACT

Operates without a boiler:
the water is rapidly heated
by a heating resistor

The water is sprayed evenly over the products.
This ensures an homogenous temperature
distribution and guarantees the quality and
safety of the products.

It is suitable to all types of products!
One basket can hold: 140 x 850 mL tins
or 320 x 230 mL Twist Off glass jars.

Our software automatically regulates
the autoclave, monitoring the
temperature and Fo value at the
products core. Independent adjustment
of pressure and temperature

Comparative		
Machine type	Goût'stave 1 basket	Mini Goût'stave
Maximum operating temperature	130°C	
Maximum operating pressure	3 bars	
Electrical power	30 kW	20 kW
Tank	internal diameter: 800mm thickness 4mm	internal diameter: 700mm thickness 4mm
Length door open (mm)	3180	2400
Length door closed (mm)	2540	1780
Width door open at 90° (mm)	1229	1400
Width door closed (mm)	991	1210
Total height (mm)	2010	1830
Internal dimensions of the basket	Length (mm)	1035
	Width (mm)	514
	Height (mm)	512
Capacity for 1 basket	200 tins 4/4	140 tins 4/4
Material	All in Stainless Steel AISI 304-L	
Operating process	Water spraying / compressed air	
Approval / certificate	CE / TÜV AD-Merkblatt-S1	
Vessel insulation	50 mm rock wool, covered with aluminium sheets
